1400 Program Expectations, Class Schedules & Textbooks

- General questions raised and answered
- Visit from graduating students
- Wrap up and add codes.

What is the Radiologic Technology Program?

- The Radiologic Technology Program at SRJC was established in 1971. Both a certificate and a major AS degree in Radiologic Technology is available. The program includes instruction in the operation of x-ray and digital imaging equipment, positioning for radiologic procedures, creating and processing images, patient care, radiologic physics, radiation protection and observational experience in other advanced imaging modalities.
- The radiologic technology program at SRJC spans 23 consecutive months including 2 fall, 2 spring and 2 summer semesters. Students are required to commit themselves for full time participation for that entire duration. In addition to the didactic coursework, a minimum of 1850 clinical hours are required in hospitals and radiology departments affiliated with Santa Rosa Junior College. Elective clinical experience in Mammography and MRI is available. Fundamental knowledge of CT and cross sectional anatomy is included in our core curriculum.

Program Mission

Program Mission

The Radiologic Technology Program at Santa Rosa Junior College offers exceptional teaching and learning in support of students to prepare them for workforce success as competent radiologic technologists in the healthcare community that they serve.

Program Objectives

- Goal 1: Students will be CLINICALLY COMPETENT
 - Students will apply radiation safety measures
 - Students will perform positioning skills with accuracy
- Goal 2: Students will demonstrate CRITICAL THINKING
 - Students will analyze radiographic images
 - Students will adapt to non-routine patients
- Goal 3: Students will COMMUNICATE effectively
 - Students will demonstrate oral communication skills
 - Students will practice written communication skills
- Goal 4: Students will demonstrate an understanding of PROFESSIONALISM
 - Students will demonstrate professional ethics
 - Students will practice professionalism in the medical environment
